

Nomad Pocket — Google Stitch 디자인 프롬프트

사용 방법

1. 아래 [전체 컨텍스트 프롬프트]를 먼저 Stitch에 입력해서 앱의 전반적인 방향을 잡는다
2. 이후 [화면별 프롬프트]를 하나씩 입력해서 각 화면을 생성한다
3. 생성 후 Follow-up 프롬프트로 세부 조정한다

전체 컨텍스트 프롬프트

첫 번째로 이것을 입력해서 전체 앱 방향을 설정

Design a personal finance tracking app called "Nomad Pocket" for a digital nomad

App concept: A smart household ledger for people who travel and live across multi
Users track income and expenses in multiple currencies, by region, and by project

Target devices: iPad (primary) and iPhone (secondary)

Platform: PWA (Progressive Web App)

Design style: Clean, modern, minimal. Light/white theme. Premium feel like a fina
not playful, not corporate. Think Notion meets Monzo.

Navigation structure:

- iPad: Fixed left sidebar (always visible)
- iPhone: Slide-in drawer from left
- Main menu items: Dashboard / Transactions / Budget / Manage
- Bottom of nav: Settings / App version

Color direction: White background (#FFFFFF or #F5F5F7), accent color in teal or i
dark charcoal typography (#1A1A1A), subtle card surfaces with light shadow and so

Typography: Modern, geometric sans-serif. Clean and highly legible for numbers an

Show both iPad layout (with fixed sidebar) and iPhone layout (with hamburger menu

화면별 프롬프트

1. Dashboard (iPad 버전)

Design the Dashboard screen for "Nomad Pocket" finance app. iPad layout. Light theme.

This screen must fit entirely on one iPad screen without scrolling.

Layout structure (top to bottom, left to right):

TOP BAR:

- App title "Nomad Pocket" on the left
- Current date (year, month, day) in the center
- Currency rate indicator on the right showing active currencies inline:
"KRW | USD ₩1,380 | JPY ₩9.2" in small pill-style badges
- Filter toggle buttons below the date: 전체 / 년간 / 월간 (selected) / 지역 / 태그

MAIN CONTENT GRID (2 columns + 1 right sidebar):

Left/Center area – 3 rows of cards:

Row 1 (2 cards side by side):

- Card A: Total EXPENSE – large number, subtitle "지출", small sparkline trend graph
- Card B: Total INCOME – large number, subtitle "수입", small sparkline trend graph

Row 2 (2 cards side by side):

- Card A: Expense breakdown donut chart by major category
- Card B: Income breakdown donut chart by major category

Row 3 (1 wide card):

- Budget goal progress – horizontal bar chart or gauge style
- Shows max 2 goals side by side within the card
- Slide indicator dots at the bottom if more than 2 goals exist

Right sidebar (1 tall card spanning all 3 rows):

- Title: "Top Spending"
- Ranked list of subcategory spending
- Each row: rank number / category name / thin bar graph / percentage / up-down (vs previous month)
- Show at least 8-10 items

Use card-based design with subtle borders or light shadows. White or off-white cards. All cards should feel premium and data-rich but not cluttered.

2. Dashboard (iPhone 버전)

Design the Dashboard screen for "Nomad Pocket" finance app. iPhone layout. Light Vertical scrollable layout.

TOP BAR:

- App title + hamburger menu icon (left)
- Current date
- Currency rate badges: "USD ₩1,380 | JPY ₩9.2" (scrollable horizontal pills)
- Filter toggles: 전체 / 년간 / 월간 / 지역 / 태그

SCROLLABLE CONTENT (top to bottom):

Section 1 – Expense card (full width): large total number, sparkline trend

Section 2 – Income card (full width): large total number, sparkline trend

Section 3 – Expense donut chart (full width card)

Section 4 – Income donut chart (full width card)

Section 5 – Budget goals (stacked vertically, each goal is a full-width card with

Section 6 – Top Spending ranked list (full width card, scrollable list inside)

Design should feel like a premium finance app on mobile. White background, clean generous padding, clear number hierarchy.

3. Transactions

Design the Transactions screen for "Nomad Pocket" finance app. iPad layout. Light

TOP BAR:

- Title: "Transactions"
- Current period shown (e.g., "2025년 4월")
- Toggle filter (pill style): 전체 (selected) / 지출 / 수입
- Period filter (pill style): 년간 / 월간 / 주간 / 일간 / 달력보기

CONTENT AREA – Two-section list:

Section 1: Fixed Expenses (고정지출)

- Section header label "고정지출" with badge count
- List rows – dimmed/muted style for unpaid items:
 - Each row: date / category icon / category name / subcategory / description / am
 - Unpaid rows: all text dimmed (opacity ~40%), dotted left border in amber color
 - Paid rows: normal full opacity
- Tapping a dimmed row opens a pre-filled input popup

Section 2: General Transactions (일반지출/수입)

- Section header: "일반 거래"
- List rows – full opacity, normal style:
 - Each row: date / type badge (지출=red, 수입=green) / major category / subcategory description / amount / region tag (small pill) / tag pills
 - Swipe left or hover to show edit and delete buttons

FLOATING ACTION BUTTON:

- Bottom right corner
- "+" icon, teal accent color, elevated shadow

Overall feel: Clean list view on white background, similar to a banking app trans
Rows should be well-spaced and scannable.

4. Transaction Input Popup

Design a modal popup for entering a new transaction in "Nomad Pocket" finance app

Popup style: Bottom sheet on iPhone / Centered modal on iPad. Rounded corners. Wh

POPUP TITLE: "새 거래 입력" with X close button

FORM FIELDS (top to bottom):

1. Date picker – show as a tappable field with calendar icon, displays selected d
2. Type selector – large segmented control: 지출 | 수입 (지출 selected by default, re
3. Major category – dropdown field with icon + label
4. Subcategory – dropdown field (dependent on major category)
5. Description – text input field
6. Amount – large number input, with currency selector button on the right
(shows active currencies: KRW / USD / JPY etc.)
Below amount: small exchange rate info text "₩1,380/USD · 오늘 환율 기준"

--- EXPENSE ONLY fields (shown when 지출 is selected) ---

7. Payment method – dropdown (카드 / 현금 / 계좌이체 etc.)
8. Region – dropdown with "+ 추가" option at the bottom
9. Tags – multi-select chip style input with "+ 추가" option
10. Fixed expense checkbox – "고정 지출로 등록" with toggle

BOTTOM BUTTON: Full-width "저장하기" button in teal accent

The form should feel clean and efficient – like a premium mobile banking input fo
White background, not cluttered, good whitespace between sections.

5. Budget

Design the Budget screen for "Nomad Pocket" finance app. iPad layout. Light theme

THREE VERTICAL SECTIONS:

TOP SECTION - Achievement History:

- Title: "달성 기록"
- Summary stats in card: total goals set / times achieved / times exceeded / achi
- Small historical bar chart showing monthly achievement trend (green=achieved, r

MIDDLE SECTION - Active Goals:

- Title: "현재 목표"
- Horizontal scrollable cards or grid of current active budget goals
- Each goal card: goal name / target amount / spent amount / remaining / circular or linear progress bar / status badge (달성중 / 초과 / 완료)

BOTTOM SECTION - Goal Setup:

- Title: "목표 설정"
- Two default template cards:
"연간 예산" and "월간 예산" with edit icons
- "+ 목표 추가" button
- Small text hint: "대분류, 소분류, 지역, 태그별 목표도 추가할 수 있어요"

Overall: Data visualization focused. Clean progress indicators on white background
Premium financial dashboard feel.

6. Manage

Design the Manage screen for "Nomad Pocket" finance app. iPad layout. Light theme

This screen manages all data settings for the ledger (not app settings).

LAYOUT: Left menu list + Right content panel (master-detail pattern on iPad)

LEFT MENU (vertical list with icons):

- 대분류 / 소분류 관리
- 지출 방식 관리
- 지역 관리
- 통화 관리
- 태그 관리
- 고정지출 관리

RIGHT CONTENT PANEL (show 대분류/소분류 as default selected):

- Header with section title + "+ 추가" button
- List of items in a clean table/list format
 - Each row: icon (if applicable) / name / edit button / delete button
- Show category hierarchy: major categories expandable to show subcategories

For 통화 관리 panel (show as alternate view):

- List of currencies with toggle switch (active/inactive)
- Primary currency badge on KRW
- Active currencies show exchange rate last updated time

White background, structured, organized. Design should feel like a clean settings

7. Settings

Design the Settings screen for "Nomad Pocket" finance app. iPad layout. Light the

Clean settings page with grouped sections:

SECTION 1 – 보안:

- 비밀번호 설정 / 생체인증 (toggle)

SECTION 2 – 데이터:

- 데이터 백업 (Excel 내보내기 / JSON 내보내기)
- 데이터 가져오기
- 데이터 전체 삭제 (red warning color)

SECTION 3 – 설정:

- 시작일 설정 (매월 며칠부터 시작할지)
- 기본 통화 설정
- 언어 설정

SECTION 4 – 앱 정보:

- 버전 정보
- 업데이트 내역
- 문의하기

Design like a native iOS Settings app – white background, clean grouped lists with clear section headers, proper spacing. Each row has a label on the left, control (toggle/value/arrow) on the right.

Follow-up 프롬프트 (수정할 때 사용)

배경 톤 조정

Make the background softer, use #F5F5F7 (light gray) instead of pure white for mo

카드 스타일 변경

Change all cards to have a subtle border (1px, rgba black 8% opacity) instead of

숫자 강조

Make all monetary amounts larger and bolder. Use a monospace or tabular number fo
all financial figures.

액센트 색상 변경

Change the accent color from teal to indigo (#6366F1). Update all buttons, active
and highlights.

아이폰 버전으로 변환

Convert this design to iPhone layout. Change the fixed sidebar to a hamburger men
Make all content full-width and vertically stacked.

한국어 텍스트 적용

Replace all placeholder English text with Korean. Keep UI labels in English but c

팁

- **Experimental Mode (Gemini 2.5 Pro)** 사용 추천 — 더 정교한 레이아웃 생성
- 한 번에 너무 많은 요소를 요청하면 결과가 뭉개짐 — 섹션별로 나눠서 요청
- 생성 후 Figma로 붙여넣기 → 세부 조정은 Figma에서
- DESIGN.md 기능을 활용하면 첫 화면의 디자인 시스템을 다음 화면에 일관되게 적용 가능
